ABOUT US

The formation of Mindful Roots stemmed from a fun and collaborative project initiated by 3 forward thinking female physicians. Our diverse backgrounds make for the foundation (and thus roots) of our practice. Our mindful and careful consideration on what we want to bring to our community is the basis behind our mission.

Our primary focus with our new adventure stems from the identified need in our community to provide both a safe and secure space, in addition to time, to discuss sensitive subject matter. Our goal is to create an open atmosphere to talk about body image, sexual, and pelvic health without judgment. The current focus will be with urinary incontinence, sexual function, pelvic floor relaxation, core strength, body image, aesthetic offerings, and overall wellness. HOW WE CARRY and FEEL about ourselves. We have some exciting tools that we hope will help you.
